

## Parent Documents

### What is Reading Eggspress?

Reading Eggspress is designed to build reading and comprehension skills, for students in grades 2-7 (7-13 year olds). Using a highly engaging virtual world, children are instantly involved and interested. They explore a virtual world with a wide variety of both learning and fun experiences. The range of activities motivates students to return regularly to complete lessons, compete against others, earn more rewards and improve their skills.

### Why am I using Reading Eggspress?

Reading Eggspress is a great way for students to review concepts that have been learned in a variety of ways. This includes interactive games with sound and animation. Many kids find this style of learning to be very enjoyable and it is a great alternative to solely providing a reading log.

### Risks that could arise

Some personal information is necessary to create a Reading Eggspress account. This can be limited to first name and last initial. The teacher sets up the student accounts and then the students log in through the classroom (teacher). The teacher is the only person who has an email associated with the account (classroom) and student completion is stored for monitoring by teacher.

### What's 'personal information'?

“People have different standards of what they consider ‘personal’ information. Sharing over social media has done a fair bit to reset our expectation. Regardless of personal definition, if the information, data, or content could be used to identify you, it’s ‘personal information’ – though professional or business contact information may be treated separately.”<sup>1</sup>(Henglstler, 2013). A student’s personal information could include: name, date of birth, address, telephone number, email address, educational information, and anything that identifies an individual, including photographs. If any information, data or content could be used to identify you it is then qualified as “personal information”.

### Why is BC so sensitive to privacy laws regarding data?

“Shortly after the 9/11 attacks on the US in 2001, the American government enacted the United States Patriot Act that allowed the United States government to search private and public data housed on servers on United States soil. At the time, The BC Medical Services Plan was hosting our provincial medical records in the United States. Unions in BC expressed concern over the ability of the American government to search through British Columbian’s personal medical records and histories. Ultimately, the rules is: if you transfer or authorize the transfer of your personal information outside of Canada, that data is subject to the laws and practices of the country where it sits – be it the United States, China, or India. (Remember that minors, under the legal care of an adult, cannot authorize such a transfer.) Not all locations have similar notions about your right to privacy. Since cloud computing is a relatively new technology, the laws and best practices governing it are still changing and there is a need to stay current.”<sup>1</sup>(Hengstler, 2013)

Changes may occur; this document is current as of terms of service on Sept. 8, 2014. Check with your own school to make sure it meets your school’s privacy policy. Review completed by Breanne Quist.

## **Why is a consent form necessary?**

Various provinces in Canada – and other jurisdictions across the world – have enacted laws to protect personal privacy. In BC, the Personal Information Protection Act (PIPA) covers all independent schools. It is one of the most defined privacy protection frameworks in Canada. PIPA states that ‘private bodies’ such as independent schools have defined legal requirements for handling your personal information when it is within their ‘custody’ and ‘control’. Generally, private bodies must make sure that your personal information cannot be stored or accessed outside of Canada without your expressed permission – ‘consent’ (Note: there are certain expectations in the law like data covered by treaties, etc.). PIPA states that your consent must be in writing, state to whom your personal information may be disclosed, and how your information will be used. Also, if you post personal information about others, their permission must also be secured.

## **What if I don’t want to consent?**

You have the right as a parent/guardian to withhold consent to your child using Reading Eggspress. Alternate activities will be provided to students in the event that parents/caregivers choose to withhold consent and that selection of an alternate activity will not affect a student’s grade.
